Rivers of Steel Arts is offering internship positions for the 2020 season in the Metal Arts program located at the Carrie Blast Furnaces National Historic Landmark. Selected interns will have the opportunity to learn from professionals and experiment with pattern-making and mold-making techniques relating to foundry work.

Interns will have the unique opportunity to work as part of a furnace crew and cast iron at the Carrie Blast Furnaces, where 1250 tons of iron was produced daily to supply the famous Homestead Steel Works. Please see below for guidelines and eligibility.

Rivers of Steel Arts offers two separate week-long workshop periods each year during which time local and national artists work side-by-side with interns to produce and cast their individual designs in solid iron. The weeklong workshop culminates with a large iron pour using a cupola-style furnace capable of tapping up to 1200lbs.

Opening to the public in 2016, Rivers of Steel's Metal Arts facility is equipped with nearly 6000 square feet of indoor workspace for pattern and mold making; a state-of-the-art Carver mixer capable of mixing up to four hundred pounds of sand per batch; and several crucible and cupola-style furnaces ranging in capacity from 50lbs to 1500lbs taps.

Participating artists and interns will work in a collaborative and stimulating environment that challenges individuals to work together throughout the process of creating large-scale sculpture and/or installation.

- Learn from professionals in the field
- Experiment with pattern and mold making.
- Enjoy space and time to exchange ideas and techniques with other artists.
- Build lifelong relationships and important professional networks.

June workshops feature visiting artist Tobias Flores

June Workshop Timeline:

June 8 – June 13, 2020.

Daily workshop hours – 11:00a – 7:00pm

June 13, 2020 – Iron Pour noon – 6:00pm (actual times may vary)

June 14, 2020 – Clean-up foundry/workshop, pick up artist work. – 10:00am – 4:00pm

September workshops feature visiting artist Coral Lambert

This workshop also culminates with a massive pour during the annual [Festival of Combustion](#) on 9.19.2020. (Access to the Festival is included with the internship).

September Workshop Timeline:

September 14 – September 19, 2020.

Daily workshop hours – 11:00a – 7:00pm

September 19, 2020 – Festival of Combustion 1 – 9pm.

Production Iron Pour noon – 6:00pm

Performance Iron Pour 6:00pm – 8:30pm.

September 20, 2020 – Clean-up foundry/workshop, pick up artist work. – 10:00am – 4:00pm

Eligibility Requirements:

- Intern artists should be career-oriented or pre-professional artists who are in the final stages of their undergraduate coursework or comparable experience level. Individuals in a graduate program, related apprenticeship program or those that consider themselves emerging artists may also apply.
- Cast iron experience is not required, but your application should reflect a significant interest in foundry work and mold making.
- Interns must commit to working at the Carrie Blast Furnaces 5 hours/day during the workshop period.
- International applicants are welcome to apply however ROS cannot assist with the VISA process.

Heavy equipment needed to produce large-scale artwork is located on site.

Artists should plan to supply hand tools, small power tools, and safety equipment.

(This includes safety equipment for pour related activities.)

Artists are responsible for purchasing and obtaining their own pattern materials.

Internship Details:

In exchange for free camping and studio space, intern artists work for Rivers of Steel Arts at least 5 hours every day. The type of work you can expect during this time includes:

- Prepare scratch molds for public workshops & product molds
- Set-up and organize the studio
- Prepare the furnace and break iron
- (September only) Facilitate scratchblocks including prep, workshop, pouring, and cleaning up during the Festival of Combustion 2020.
- Clean-up the workshop and foundry area on the final day of the internship

Accommodations: Free camping is available off-site nearby the Carrie Blast Furnaces for interns and artists during the workshop period. Meals are not provided during the week. One meal is provided for all interns and artists on the pour day only.

Interns must fund their own travel to/from the Carrie Blast Furnaces.

Note: Camping is located 1.5 miles from the site. Interns and artists often carpool during the week.

Inquire via email for more information.

Application Process:

To apply for Rivers of Steel Arts' 2019 Metal Art Internships, please complete & submit Items 1-4

Send application materials to cmcginnis@riversofsteel.com

The Deadline for all materials: Midnight EST on May 1, 2019

Incomplete applications will not be considered

Please submit all text documents as PDFs and images as JPEGs

1. Application Cover Sheet

Save as a PDF labeled with applicant's last name example. Lastname_Cover.pdf

2. Six Work Samples

A selection of images or video of recent work demonstrating mold-making, pattern-making, and/or iron casting ability. All JPG files should be under 1 MB each and video files should be no longer than 1 minute. Label proposal files with the applicant's last name followed by an underscore and number ex. LastName_1.jpg

3. Image Script

A numbered list that corresponds to each of the 6 portfolio images. For each image, include the title, date, materials, dimensions, and if necessary a two sentence description of the work.

Submit as a PDF labeled with applicant's last name.

4. Current CV

Submit as a PDF labeled with applicant's last name.

5. Project Proposal

Provide a statement (300 word max) describing the project you plan to cast while in residence. This statement should include the expected scale and number of castings. (Please note that all interns are provided with 400lbs of complementary sand and chemical. Sand/chemical needs beyond this amount are available for \$.30/lbs.)
