# THE RIVER FOOD WEB

Animals in an ecosystem form a food web. In the illustration below, use arrows to map out the energy transfer between organisms. The first one has been added as an example.

Name two producers in the food web above.

Asterionella and Spyrogyra (algae)

Name three consumers in the food web above.

Frog, Great Blue Heron, Kingfisher

Dragonfly Nymph, Bluegill, Mayfly Nymph

What is the difference between food chains and food webs?

FOOD WEBS show how plants and animals are connected in many ways to help them all survive. FOOD CHAINS follow just one path of energy as animals find food.
